Forwarding Rules	View All Hosts
-------------------------	-----------------------

Rule names marked with '*' are protocol-specific rules that NetCache provides. NetCache automatically enables a protocol-specific rule unless you create a custom rule specific to the same protocol.

Current Rules 33-34 **New Rule**

Def	Enabled	Edit	Rule Name	Protocol	Conditions	Dist	Methods	Hosts
-	<input type="checkbox"/>	[Edit] 1	noncacheable	noncacheable		direct		
-	<input type="checkbox"/>	[Edit] 2	my new rule	http		single-host	goatlord nc netapp co	
-	<input type="checkbox"/>	[Edit] 3	local domain	server-domain = nc netapp com		direct		
-	<input type="checkbox"/>	-	HTTP-to-all *	http,tunnel,ftp,gopher		cluster	goatlord nc netapp co blood netapp com	
-	<input type="checkbox"/>	-	MMS-to-all *	mms		cluster	goatlord nc netapp co blood netapp com	
-	<input type="checkbox"/>	-	RTSP-to-all *	rtsp		cluster	goatlord nc netapp co blood netapp com
